

# KD-Validated Anti-CD147 Rabbit Monoclonal Antibody

*Rabbit monoclonal antibody*

ABG1420

## Product Overview

|                             |                                                                                                              |
|-----------------------------|--------------------------------------------------------------------------------------------------------------|
| <b>Name</b>                 | KD-Validated Anti-CD147 Rabbit Monoclonal Antibody                                                           |
| <b>Accession(Primary)</b>   | P35613                                                                                                       |
| <b>Host Species</b>         | Rabbit                                                                                                       |
| <b>Clonality</b>            | Monoclonal                                                                                                   |
| <b>Isotype</b>              | Rabbit IgG                                                                                                   |
| <b>Immunogen</b>            | A synthesized peptide derived from human CD147                                                               |
| <b>Species Reactivity</b>   | Human                                                                                                        |
| <b>Calculated MW</b>        | Predicted, 42 kDa , observed, 33-65 kDa                                                                      |
| <b>Storage Buffer</b>       | Supplied in PBS (pH 7.4) containing 50% glycerol, and 0.02% sodium azide.                                    |
| <b>Recommended Dilution</b> | Western Blotting (WB): 1:1,000-1:5,000 Flow Cytometry (FCM): 1:2,000 Immunocytochemistry (IC): 1:100-1:1,000 |

## Target information (P35613)

|                          |                                                                                                                                                                                                                                                         |
|--------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Gene Name</b>         | BSG                                                                                                                                                                                                                                                     |
| <b>About Gene Symbol</b> | BSG (Basigin (Ok Blood Group)) is a collagen extracellular matrix protein involved in adaptive immunity. It is an important research target in cancer research and is widely studied to elucidate cellular mechanisms and identify therapeutic targets. |

Western blotting analysis using anti-CD147 antibody (Cat#ABG1420). Total cell lysates (30 µg) from various cell lines were loaded and separated by SDS-PAGE. The blot was incubated with anti-CD147 antibody (Cat#ABG1420, 1:5,000) and HRP-conjugated goat anti-rabbit secondary antibody respectively.

Western blotting analysis using anti-CD147 antibody (Cat#ABG1420). CD147 expression in wild type (WT) and BSG shRNA knockdown (KD) HeLa cells with 30 µg of total cell lysates. Hsp90 α serves as a loading control. The blot was incubated with anti-CD147 antibody (Cat#ABG1420, 1:5,000) and HRP-conjugated goat anti-rabbit secondary antibody respectively.

Flow cytometric analysis of CD147 expression in HepG2 cells using CD147 antibody (Cat#ABG1420, 1:2,000). Green, isotype control; red, CD147.

Immunocytochemical staining of HepG2 cells with CD147 antibody (Cat#ABG1420, 1:1,000). Nuclei were stained blue with DAPI; CD147 was stained magenta with Alexa Fluor® 647. Images were taken using Leica stellaris 5. Protein abundance based on laser Intensity and smart gain: medium. Scale bar: 20  $\mu$ m.
