ANXA10 Human (1-162)

Annexin A10 (1-162 a.a.) Human Recombinant
RCP0064

Product Overview

Name	ANXA10 Human (1-162)
Description	
Annexin A10 (1-162 a.a.) Human Recombinant	
Accession (Primary)	Q9UJ72
Synonyms	
anxa-10.	
Source	
Escherichia Coli.	
Physical Appearance	
Filtered White lyophilized (freeze-dried) powder.	
Formulation	
Each mg was lyophilized with 1xPBS, 0.4% SDS and 4mM DTT.	
Stability	
Store lyophilized ANXA10 at -20°C. Aliquot the product after reconstitution to avoid repeated freezing/thawing cycles. Reconstituted protein can be stored at 4°C for a limited period of time; it does not show any change after two weeks at 4°C.	
Purity	
Greater than 90% as determined by SDS-PAGE.	
Solubility	
It is recommended to add deionized water to prepare a working stock solution of approximately 0.5mg/ml and let the lyophilized pellet dissolve completely. Product is not sterile! Please filter the product by an appropriate sterile filter before using it on cell culture.	
Background	
Annexin A10 also known as ANXA10 is a part of the annexin family of calcium-binding proteins which members own a conserved core domain and a unique amino-terminal region which may convene binding specificity. The ANXA10 protein contains 4 annexin domains and plays a role in the regulation of cellular growth and signal transduction pathways throughout the cell.	
Precautions	

9051 Mira Mesa Blvd, #910094
San Diego, CA 92191
Tel: 760-390-3989

ANXA10 Human (1-162) is for research use only and not for use in diagnostic or therapeutic procedures.

Target Information: (Q9UJ72)

Background

Annexin A10 also known as ANXA10 is a part of the annexin family of calcium-binding proteins which members own a conserved core domain and a unique amino-terminal region which may convene binding specificity. The ANXA10 protein contains 4 annexin domains and plays a role in the regulation of cellular growth and signal transduction pathways throughout the cell.
