

KD-Validated Anti-Malate Dehydrogenase 1 Rabbit

Rabbit monoclonal antibody

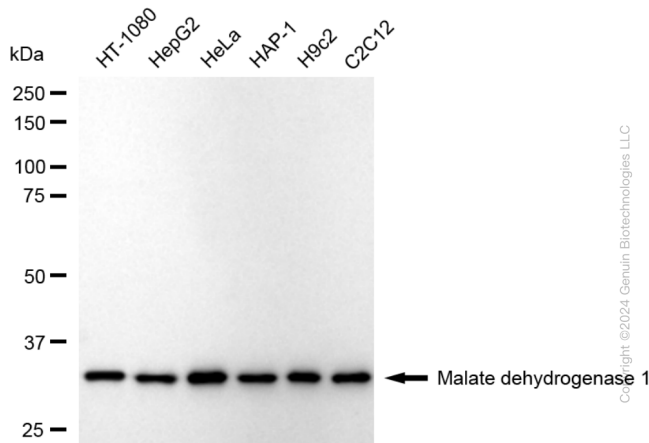

ABG1671

Product Overview

Name	KD-Validated Anti-Malate Dehydrogenase 1 Rabbit Monoclonal Antibody
Accession(Primary)	P40925
Host Species	Rabbit
Clonality	Monoclonal
Isotype	Rabbit IgG
Immunogen	A synthesized peptide derived from human MDH1
Species Reactivity	Human, Mouse, Rat
Calculated MW	Predicted, 36 kDa , observed , 36 kDa
Storage Buffer	Supplied in PBS (pH 7.4) containing 50% glycerol, and 0.02% sodium azide.
Recommended Dilution	Western Blotting (WB):1:1,000-1:5,000 Flow Cytometry (FCM): 1:2,000

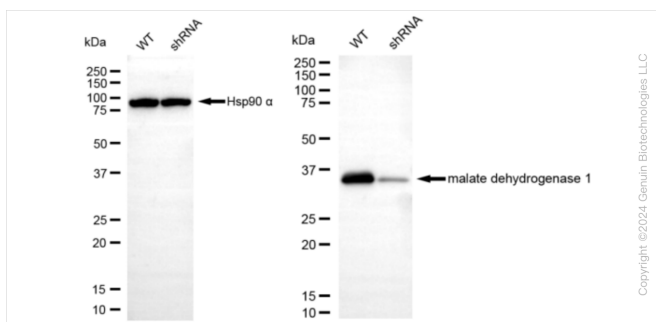

Target information (P40925)

Gene Name	MDH1
About Gene Symbol	MDH1 (Malate Dehydrogenase 1) is a metabolic dehydrogenase involved in cellular metabolism. It is an important research target in metabolic disease, cancer metabolism, and drug discovery and is widely studied to elucidate cellular mechanisms and identify therapeutic targets.

Western blotting analysis using anti-Malate dehydrogenase 1 antibody (Cat#ABG1671). Total cell lysates (30 µg) from various cell lines were loaded and separated by SDS-PAGE. The blot was incubated with anti-Malate dehydrogenase 1 antibody (Cat#ABG1671, 1:5,000) and HRP-conjugated goat anti-rabbit secondary antibody respectively.

Western blotting analysis using anti-malate dehydrogenase 1 antibody (Cat#ABG1671). Malate dehydrogenase 1 expression in wild-type (WT) and malate dehydrogenase 1 (MDH1) shRNA knockdown (KD) HeLa cells with 20 µg of total cell lysates. Hsp90 α serves as a loading control. The blot was incubated with anti-malate dehydrogenase 1 antibody (Cat#ABG1671, 1:5,000) and HRP-conjugated goat anti-rabbit secondary antibody respectively.
