CD200R1 Human

CD200 Receptor 1 Human Recombinant
CDA0028

Product Overview

Name	CD200R1 Human
Description	
CD200 Receptor 1 Human Recombinant	
Accession (Primary)	Q8TD46
Synonyms	
Cell surface glycoprotein CD200 receptor 1 isoform d, CD200R1, CD200R, HCRTR2, MOX2R, OX2R, Cell surface glycoprotein CD200 receptor 1, CD200 cell surface glycoprotein receptor, Cell surface glycoprotein OX2 receptor 1, Cd200r1, Mox2r, Ox2r.	
Introduction	
CD200R1, also known as cell surface glycoprotein CD200 receptor 1, is an isoform of CD200 receptors which is expressed on cells of the myeloid lineage. CD200R1 inhibitory signaling pathway has been involved in taking a prominent role in limiting inflammation in a broad range of inflammatory diseases. CD200R1 signaling inhibits the expression of proinflammatory molecules including tumor necrosis factor, interferons, in addition to inducible nitric oxide synthase in response to selected stimuli.	
Source	
Sf9, Baculovirus cells.	
Physical Appearance	
Sterile filtered colorless solution.	
Formulation	
CD200R1 protein solution (0.25mg/ml) contains phosphate buffered saline (pH7.4) and 10% glycerol.	
Stability	
Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Avoid multiple freeze-thaw cycles.	
Purity	
Greater than 90.0% as determined by SDS-PAGE.	
Amino acid sequence

Precautions

CD200R1 Human is for research use only and not for use in diagnostic or therapeutic procedures.

Target Information: (Q8TD46)
