AFP Human

Alpha-Fetoprotein Human
NTP0003

Product Overview

Name	AFP Human
Description	
Alpha-Fetoprotein Human	
Accession (Primary)	P02771
Synonyms	
Alpha-fetoprotein, Alpha-fetoglobulin, Alpha-1-fetoprotein, AFP, FETA, HPAFP.	
Introduction	
AFP is normally synthesized in the liver, intestinal tract, and yolk sac of the fetus. Antibody to AFP has been shown to be useful in detecting hepatocellular carcinomas (HCC) and germ cell neoplasms, especially yolk sac tumors.	
Source	
Human cord serum.	
Physical Appearance	
Sterile Filtered clear solution.	
Formulation	
AFP protein filtered (0.2 µm) solution in Tris buffered saline pH 7.5 and less than 0.1% NaN 3 .	
Stability	
Human Alpha-Fetoprotein should be stored at 2-8°C.	
Purity	
Greater than 95%.	
Precautions	
AFP Human is for research use only and not for use in diagnostic or therapeutic procedures.	

Target Information: (P02771)
