Microfibrillar-associated protein 2, MFAP-2, Microfibril-associated glycoprotein 1, MAGP, MAGP-1, MFAP2, MAGP1.	
Introduction	
Microfibrillar-associated protein 2 (MFAP2) is an O-glycosylated protein discharged to the extracellular space and the extracellular matrix. MFAP2 connects with biglycan and elastin in a ternary complex. MFAP2 plays a key role in the support and distensibility of the juxtacanalicular region of these collector channels. MFAP2 inhibits LTB-1 binding to fibrillin-1, promotes the phosphorylation of Smad2 thus mediating the consequent extracellular deposition of latent TGFbeta.	
Source	
Escherichia Coli.	
Physical Appearance	
Sterile Filtered clear solution.	
Formulation	
MFAP2 protein solution (0.5mg/ml) containing 20mM Tris-HCl buffer (pH 8.0), 1M Urea and 20% glycerol.
