

# Mitochondrial Ribosomal Protein L11 Rabbit mAb

ABZ1731

## Product Overview

|                             |                                                                            |
|-----------------------------|----------------------------------------------------------------------------|
| <b>Name</b>                 | Mitochondrial Ribosomal Protein L11 Rabbit mAb                             |
| <b>Accession(Primary)</b>   | Q9Y3B7                                                                     |
| <b>Host Species</b>         | Rabbit                                                                     |
| <b>Clonality</b>            | Monoclonal                                                                 |
| <b>Isotype</b>              | IgG                                                                        |
| <b>Species Reactivity</b>   | Human                                                                      |
| <b>Calculated MW</b>        | Calculated MW: 21 kDa; Observed MW: 21 kDa                                 |
| <b>Recommended Dilution</b> | WB-1:1000-1:5000; IHC-P-1:200-1:500;<br>ICC/IF-1:50-1:100; FC-1:100-1:1000 |

## Target information (Q9Y3B7)

|                          |                                                                                                                                                                                                                                                                                                                       |
|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Gene Name</b>         | MRPL11                                                                                                                                                                                                                                                                                                                |
| <b>About Gene Symbol</b> | MRPL11 (Mitochondrial Ribosomal Protein L11) is a protein kinase and signaling regulator involved in translational regulation. It is an important research target in cancer, cell signaling, and therapeutic target research and is widely studied to elucidate cellular mechanisms and identify therapeutic targets. |

Western blot analysis of Mitochondrial ribosomal protein L11 in HeLa lysates using Mitochondrial Ribosomal Protein L11 antibody.
