

# Carbonic Anhydrase 9 Rabbit mAb

ABZ3460

## Product Overview

|                             |                                 |
|-----------------------------|---------------------------------|
| <b>Name</b>                 | Carbonic Anhydrase 9 Rabbit mAb |
| <b>Accession(Primary)</b>   | Q16790                          |
| <b>Host Species</b>         | Rabbit                          |
| <b>Clonality</b>            | Monoclonal                      |
| <b>Isotype</b>              | IgG                             |
| <b>Species Reactivity</b>   | Human                           |
| <b>Recommended Dilution</b> | IHC-1:100-1:200                 |

## Target information (Q16790)

|                          |                                                                                                                                                                                                                                |
|--------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Gene Name</b>         | CA9                                                                                                                                                                                                                            |
| <b>About Gene Symbol</b> | CA9 (Carbonic Anhydrase 9) is a metabolic enzyme involved in adaptive immunity. It is an important research target in cancer research and is widely studied to elucidate cellular mechanisms and identify therapeutic targets. |
