

## ACTL6A Rabbit mAb

ABZ3254

### Product Overview

|                             |                                                          |
|-----------------------------|----------------------------------------------------------|
| <b>Name</b>                 | ACTL6A Rabbit mAb                                        |
| <b>Accession(Primary)</b>   | O96019                                                   |
| <b>Host Species</b>         | Rabbit                                                   |
| <b>Clonality</b>            | Monoclonal                                               |
| <b>Isotype</b>              | IgG                                                      |
| <b>Species Reactivity</b>   | Human, Mouse, Rat                                        |
| <b>Calculated MW</b>        | Calculated MW: 47 kDa; Observed MW: 47 kDa               |
| <b>Recommended Dilution</b> | WB-1:1000-1:5000; IHC-P-1:50-1:100;<br>ICC/IF-1:50-1:100 |

### Target information (O96019)

|                          |                                                                                                                                                                                                                                                                                              |
|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Gene Name</b>         | ACTL6A                                                                                                                                                                                                                                                                                       |
| <b>About Gene Symbol</b> | ACTL6A (Actin Like 6A) is a structural cytoskeletal protein involved in cytoskeletal organization. It is an important research target in cell biology, cancer metastasis, and cytoskeletal research and is widely studied to elucidate cellular mechanisms and identify therapeutic targets. |

Immunocytochemistry analysis of ACTL6A (green) in Jurkat using ACTL6A antibody, and DAPI (blue).

Western blot analysis of ACTL6A in HeLa, MCF-7, HepG2, U2OS lysates using ACTL6A antibody.
