

# Eotaxin Rhesus Macaque

## *Eotaxin Rhesus Macaque Recombinant (CCL11)*

CHK0038

## Product Overview

|                           |                                                                                                                                                                                                                              |
|---------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Name</b>               | Eotaxin Rhesus Macaque                                                                                                                                                                                                       |
| <b>Accession(Primary)</b> | Q8MIT7                                                                                                                                                                                                                       |
| <b>Immunogen</b>          | Anti-human EPCAM mAb, clone PAT37F9AT, is derived from hybridization of mouse F0 myeloma cells with spleen cells from BALB/c mice immunized with a recombinant human EPCAM protein 24-265 amino acids purified from E. coli. |
| <b>Description</b>        | Eotaxin Rhesus Macaque Recombinant (CCL11)                                                                                                                                                                                   |
