Gene Name	CIRBP
About Gene Symbol	CIRBP (Cold Inducible RNA Binding Protein) is a protein kinase and signaling regulator involved in cell signaling and proliferation. It is an important research target in cancer, cell signaling, and therapeutic target research and is widely studied to elucidate cellular mechanisms and identify therapeutic targets.

Western blot analysis of CIRBP in HeLa lysates using CIRBP antibody.

Immunohistochemistry analysis of paraffin-embedded Human breast cancer using CIRBP antibody. High-pressure and temperature Sodium Citrate pH 6.0 was used for antigen retrieval.
