

## GC1q R Rabbit mAb

ABZ2224

### Product Overview

|                             |                                            |
|-----------------------------|--------------------------------------------|
| <b>Name</b>                 | GC1q R Rabbit mAb                          |
| <b>Accession(Primary)</b>   | Q07021                                     |
| <b>Host Species</b>         | Rabbit                                     |
| <b>Clonality</b>            | Monoclonal                                 |
| <b>Isotype</b>              | IgG                                        |
| <b>Species Reactivity</b>   | Human, Mouse, Rat                          |
| <b>Calculated MW</b>        | Calculated MW: 31 kDa; Observed MW: 31 kDa |
| <b>Recommended Dilution</b> | WB-1:1000-1:5000; IHC-P-1:100-1:200        |

### Target information (Q07021)

|                          |                                                                                                                                                                                                                                                                                                                         |
|--------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Gene Name</b>         | C1QBP                                                                                                                                                                                                                                                                                                                   |
| <b>About Gene Symbol</b> | C1QBP (Complement C1q Binding Protein) is a protein kinase and signaling regulator involved in cell signaling and proliferation. It is an important research target in cancer, cell signaling, and therapeutic target research and is widely studied to elucidate cellular mechanisms and identify therapeutic targets. |

Western blot analysis of GC1q R in K562, rat Brain, C6, 3T3, Hela lysates using GC1q R antibody.
