

IGFBP2 Mouse

Insulin Like Growth Factor Binding Protein-2 Mouse Recombinant

GRF0179

Product Overview

Name	IGFBP2 Mouse
Accession(Primary)	P47877
Description	Insulin Like Growth Factor Binding Protein-2 Mouse Recombinant

Target information (P47877)

Gene Name

About Gene Symbol

Background

Insulin-like growth factor-binding protein 2 (IGFBP2) is a key regulator of insulin-like growth factor (IGF) signaling pathway, playing crucial roles in cell proliferation, differentiation, and survival. IGFBP2, a member of the IGFBP family, modulates the bioavailability and activity of IGFs by binding to them and regulating their interaction with cell surface receptors. In recent years, IGFBP2 has emerged as a promising target for research due to its involvement in various physiological processes and its implications in several diseases, including cancer, metabolic disorders, and neurodegenerative conditions.
