

# Junctional Adhesion Molecule 1/JAM-A Rabbit mAb

ABZ1718

## Product Overview

|                             |                                                 |
|-----------------------------|-------------------------------------------------|
| <b>Name</b>                 | Junctional Adhesion Molecule 1/JAM-A Rabbit mAb |
| <b>Accession(Primary)</b>   | Q9Y624                                          |
| <b>Host Species</b>         | Rabbit                                          |
| <b>Clonality</b>            | Monoclonal                                      |
| <b>Isotype</b>              | IgG                                             |
| <b>Species Reactivity</b>   | Human                                           |
| <b>Calculated MW</b>        | Calculated MW: 33 kDa; Observed MW: 33 kDa      |
| <b>Recommended Dilution</b> | WB-1:1000-1:5000; IHC-P-1:100-1:200             |

## Target information (Q9Y624)

|                          |                                                                                                                                                                                                                                                                                        |
|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Gene Name</b>         | F11R                                                                                                                                                                                                                                                                                   |
| <b>About Gene Symbol</b> | F11R (Junction adhesion molecule 1) is a membrane receptor involved in receptor-mediated signaling. It is an important research target in cell signaling, drug discovery, and cancer research and is widely studied to elucidate cellular mechanisms and identify therapeutic targets. |

Western blot analysis of Junctional Adhesion Molecule 1/JAMA in K562, PC-3 lysates using Junctional Adhesion Molecule 1 antibody.

Immunohistochemistry analysis of paraffin-embedded Human lung cancer using Junctional Adhesion Molecule 1 antibody. High-pressure and temperature Sodium Citrate pH 6.0 was used for antigen retrieval.
