

## NDUFB11 Rabbit mAb

ABZ1798

### Product Overview

|                             |                                                        |
|-----------------------------|--------------------------------------------------------|
| <b>Name</b>                 | NDUFB11 Rabbit mAb                                     |
| <b>Accession(Primary)</b>   | Q9NX14                                                 |
| <b>Host Species</b>         | Rabbit                                                 |
| <b>Clonality</b>            | Monoclonal                                             |
| <b>Isotype</b>              | IgG                                                    |
| <b>Species Reactivity</b>   | Human, Mouse, Rat                                      |
| <b>Calculated MW</b>        | Calculated MW: 17 kDa; Observed MW: 17 kDa             |
| <b>Recommended Dilution</b> | WB-1:1000-1:5000; IHC-P-1:100-1:200;<br>FC-1:100-1:200 |

### Target information (Q9NX14)

|                          |                                                                                                                                                                                                                                                                                                                   |
|--------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Gene Name</b>         | NDUFB11                                                                                                                                                                                                                                                                                                           |
| <b>About Gene Symbol</b> | <p>NDUFB11 (NADH:Ubiquinone Oxidoreductase Subunit B11) is a metabolic dehydrogenase involved in cellular metabolism. It is an important research target in metabolic disease, cancer metabolism, and drug discovery and is widely studied to elucidate cellular mechanisms and identify therapeutic targets.</p> |

Immunohistochemistry analysis of paraffin-embedded mouse colon using NDUF B11 antibody. High-pressure and temperature Sodium Citrate pH 6.0 was used for antigen retrieval.

Western blot analysis of NDUF B11 in rat heart, rat skeletal muscle lysates using NDUF B11 antibody.

Western blot analysis of NDUFB11 in LnCap, CaCo2 lysates using NDUFB11 antibody

Western blot analysis of NDUFB11 in HeLa, 3T3, PC-3 lysates using NDUFB11 antibody.
