

## NDUFB9 Rabbit mAb

ABZ1710

### Product Overview

|                             |                                                                                              |
|-----------------------------|----------------------------------------------------------------------------------------------|
| <b>Name</b>                 | NDUFB9 Rabbit mAb                                                                            |
| <b>Accession(Primary)</b>   | Q9Y6M9                                                                                       |
| <b>Host Species</b>         | Rabbit                                                                                       |
| <b>Clonality</b>            | Monoclonal                                                                                   |
| <b>Isotype</b>              | IgG                                                                                          |
| <b>Species Reactivity</b>   | Human, Mouse, Rat                                                                            |
| <b>Calculated MW</b>        | Calculated MW: 22 kDa; Observed MW: 22 kDa                                                   |
| <b>Recommended Dilution</b> | WB-1:500-1:1000; IHC-P-1:100-1:200;<br>ICC/IF-1:100-1:200; FC-1:200-1:500;<br>IP-1:100-1:200 |

### Target information (Q9Y6M9)

|                          |                                                                                                                                                                                                                                                                               |
|--------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Gene Name</b>         | NDUFB9                                                                                                                                                                                                                                                                        |
| <b>About Gene Symbol</b> | <p>NDUFB9 (NADH:Ubiquinone Oxidoreductase Subunit B9) is a metabolic dehydrogenase involved in cellular metabolism.</p> <p>It is an important research target in metabolic disease, cancer metabolism, and drug discovery and is widely studied to elucidate cellular mec</p> |

Western blot analysis of NDUFB9 in mouse kidney lysates using NDUFB9 antibody.

Western blot analysis of NDUFB9 in rat Brain lysates using NDUFB9 antibody.

Immunocytochemistry analysis of NDUF9(green)  
in HeLa using NDUF9 antibody, and DAPI(blue)

Immunohistochemistry analysis of paraffin-  
embedded Human colon cancer using NDUF9  
antibody. High-pressure and temperature Sodium  
Citrate pH 6.0 was used for antigen retrieval.
