

CENPA Human

Centromere Protein A Human Recombinant

RCP0388

Product Overview

Name	CENPA Human
Accession(Primary)	P49450
Description	Centromere Protein A Human Recombinant

Target information (P49450)

Gene Name

About Gene Symbol

CENPA (Centromere Protein A) is an epigenetic and nuclear regulatory protein involved in chromatin remodeling and epigenetics and adaptive immunity. It is an important research target in epigenetic regulation, chromatin biology, and cancer research and is widely studied to elucidate cellular mechanisms and identify therapeutic targets.
