

CRABP1 Human

Cellular Retinoic Acid binding Protein 1 Human Recombinant

RCP0516

Product Overview

Name	CRABP1 Human
Accession(Primary)	P29762
Immunogen	Anti-human CRABP2 mAb is derived from hybridization of mouse F0 myeloma cells with spleen cells from BALB/c mice immunized with recombinant human CRABP2 amino acids 1-138 purified from E. coli.
Description	Cellular Retinoic Acid binding Protein 1 Human Recombinant

Target information (P29762)

Gene Name	
About Gene Symbol	CRABP1 (Cellular Retinoic Acid Binding Protein 1) is a protein kinase and signaling regulator involved in cell signaling and proliferation. It is an important research target in cancer, cell signaling, and therapeutic target research and is widely studied to elucidate cellular mechanisms and identify therapeutic targets.
