

## GIPC1 Human

*GIPC PDZ Domain Member 1 Human Recombinant*

RCP0915

### Product Overview

|                           |                                                                                                                                                                                                  |
|---------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Name</b>               | GIPC1 Human                                                                                                                                                                                      |
| <b>Accession(Primary)</b> | O14908                                                                                                                                                                                           |
| <b>Immunogen</b>          | Anti-human GIPC2 mAb, is derived from hybridization of mouse FO myeloma cells with spleen cells from BALB/c mice immunized with recombinant human GIPC2 amino acids 1-315 purified from E. coli. |
| <b>Description</b>        | GIPC PDZ Domain Member 1 Human Recombinant                                                                                                                                                       |

### Target information (O14908)

|                          |                                                                                                                                                                                                                                                                 |
|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Gene Name</b>         |                                                                                                                                                                                                                                                                 |
| <b>About Gene Symbol</b> | GIPC1 (GIPC PDZ Domain Containing Family Member 1) is a membrane receptor involved in receptor-mediated signaling. It is an important research target in cell signaling, drug discovery, and cancer research and is widely studied to elucidate cellular mechan |
