

## KPNA2 Human

*Karyopherin Alpha 2 Human Recombinant*

RCP1187

### Product Overview

|                           |                                       |
|---------------------------|---------------------------------------|
| <b>Name</b>               | KPNA2 Human                           |
| <b>Accession(Primary)</b> | P52292                                |
| <b>Description</b>        | Karyopherin Alpha 2 Human Recombinant |

### Target information (P52292)

#### Gene Name

#### About Gene Symbol

KPNA2 (Karyopherin Subunit Alpha 2) is a protein kinase and signaling regulator involved in cell signaling and proliferation. It is an important research target in cancer, cell signaling, and therapeutic target research and is widely studied to elucidate cellular mechanisms and identify therapeutic targets.
