LAMP2 Human

Lysosomal-Associated Membrane Protein 2 Human Recombinant
RCP1219

Product Overview

Name	LAMP2 Human

Description

Lysosomal-Associated Membrane Protein 2 Human Recombinant

Accession (Primary)	P13473

Synonyms

Lysosomal-associated membrane protein 2, CD107b, LAMP-2, CD107 antigen-like family member B, LGP110, LAMP2.

Introduction

The protein encoded by LAMP2 belongs to a family of membrane glycoproteins. This glycoprotein provides selectins with carbohydrate ligands LAMP2 takes part in tumor cell metastasis and in addition has a role in the protection, maintenance, and adhesion of the lysosome. The effect of alternative splicing of this gene is multiple transcript variants encoding distinct proteins.

Source

Sf9 insect cells.

Formulation

LAMP2 (0.94mg/ml) is supplied in 16mM HEPES buffer pH-8.0, 130mM NaCl and 20% Glycerol.

Stability

Store LAMP2 at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. Avoid multiple freeze-thaw cycles.

Precautions

LAMP2 Human is for research use only and not for use in diagnostic or therapeutic procedures.

Target Information: (P13473)
