

LETMD1 Human

LETM1 Domain Containing 1 Human Recombinant

RCP1238

Product Overview

Name	LETMD1 Human
Accession(Primary)	Q6P1Q0
Description	LETM1 Domain Containing 1 Human Recombinant

Target information (Q6P1Q0)

Gene Name

About Gene Symbol

Background

Leucine Rich Transmembrane Protein Domain 1 also known as LETMD1 is a protein encoded by the LETMD1 gene in humans. LETMD1 is a membrane-associated protein which takes part in maintaining cellular homeostasis and is involved in specific pathways related to metabolic regulation. LETMD1 participates in various cellular processes, including apoptosis, regulation of cell growth and differentiation and protein trafficking. LETMD1 regulates mitochondrial function and energy metabolism and also interacts with various mitochondrial proteins.
