

## MCM7 Human

*Minichromosome Maintenance Complex Component 7 Human Recombinant*

RCP1340

### Product Overview

|                           |                                                                                                                                                                                                          |
|---------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Name</b>               | MCM7 Human                                                                                                                                                                                               |
| <b>Accession(Primary)</b> | P33993                                                                                                                                                                                                   |
| <b>Immunogen</b>          | Anti-human MCM7 mAb, is derived from hybridization of mouse F0 myeloma cells with spleen cells from BALB/c mice immunized with a recombinant human MCM7 protein 1-414 amino acids purified from E. coli. |
| <b>Description</b>        | Minichromosome Maintenance Complex<br>Component 7 Human Recombinant                                                                                                                                      |

### Target information (P33993)

|                          |                                                                                                                                                                                                                                                                                                      |
|--------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Gene Name</b>         |                                                                                                                                                                                                                                                                                                      |
| <b>About Gene Symbol</b> | MCM7 (Minichromosome Maintenance Complex Component 7) is a metabolic enzyme involved in cellular metabolism. It is an important research target in metabolic disease, cancer metabolism, and drug discovery and is widely studied to elucidate cellular mechanisms and identify therapeutic targets. |
