S.Typhi H

Salmonella Typhi H Antigen Recombinant
VAG0424

Product Overview

Name	S.Typhi H

Description

Salmonella Typhi H Antigen Recombinant

Introduction

Salmonella Typhi is a pathogen causing typhoid fever, affecting over 17 million people with approximately 600,000 deaths annually worldwide. If untreated, typhoid fever cases result in mortality rates ranging from 12-30%.

Source

Escherichia Coli.

Physical Appearance

Sterile Filtered solution.

Formulation

Sterile Filtered solution containing PBS and 25mM arginine.

Stability

S.Typhi H although stable at 4°C for 1 week, should be stored below -18°C. Please prevent freeze thaw cycles.

Purity

Protein is >95% pure as determined by 10% PAGE (coomassie staining).

Applications

Immunoassay.

Precautions

S.Typhi H is for research use only and not for use in diagnostic or therapeutic procedures.
